**COAL ASIA HOLDINGS INCORPORATED AND SUBSIDIARY**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**1. Reporting Entity**

Coal Asia Holdings Incorporated (the Parent Company or CAHI) was incorporated in the Philippines and registered with the Securities and Exchange Commission (SEC) on June 11, 2012. The Parent Company was organized primarily to be a holding company of Titan Mining and Energy Corporation (the Subsidiary or TMEC). The Parent Company and TMEC are collectively referred to as “the Group.”

TMEC was incorporated and registered with the SEC on November 11, 2008. TMEC is engaged in the operations of coal mining and energy related business.

The Parent Company and the stockholders of TMEC entered into a Deed of Assignment on May 28, 2012. The Parent Company issued 3,200,000,000 common shares at a par value of ₱1 in exchange for and in full consideration of the 87,500,000 common shares at a par value of ₱1 of TMEC (see Note 5) to acquire 100% ownership.

On September 12, 2012, the Board of Directors of the Philippine Stock Exchange, Inc. (PSE) approved the application of the Parent Company for the listing of 4,000,000,004 common shares with a par value of ₱1 per share, of which 3,200,000,004 common shares were issued and outstanding and 800,000,000 common shares were offered to the public on a primary basis for Initial Public Offering (IPO).

On October 23, 2012, the Parent Company became a publicly listed company. As at December 31, 2013 and 2012, 4,000,000,004 shares of the Parent Company are listed in the PSE.

The registered office address of the Parent Company is 3rd Floor, JTKC Center, 2155 Chino Roces Ave., Makati City.

---

**2. Basis of Preparation and Statement of Compliance**

The consolidated financial statements have been prepared on a historical cost basis, except for the available-for-sale (AFS) financial assets included in funds held in escrow which have been measured at fair value. The consolidated financial statements are presented in Philippine Peso, which is the Group’s functional and presentation currency. All values represent absolute amounts unless otherwise indicated.

Moreover, the consolidated financial statements have been prepared in compliance with Philippine Financial Reporting Standards (PFRS) issued by the Philippine Financial Reporting Standards Council and adopted by the SEC. This financial reporting framework includes PFRS, Philippine Accounting Standards (PAS) and Philippine interpretations from International Financial Reporting Interpretations Committee (IFRIC).

---

### 3. Summary of Changes in PFRS

#### Adoption of New and Revised PFRS

The accounting policies adopted are consistent with those of the previous financial year, except for the adoption of the following new and amended PFRS and Philippine Interpretation from IFRIC which the Group adopted effective January 1, 2014:

- Amendments to PAS 32, *Financial Instruments: Presentation - Offsetting Financial Assets and Financial Liabilities* - The amendments address inconsistencies in current practice when applying the offsetting criteria in PAS 32. The amendments clarify (1) the meaning of 'currently has a legally enforceable right of set-off'; and (2) that some gross settlement systems may be considered equivalent to net settlement.
- Amendments to PAS 36, *Impairment of Assets - Recoverable Amount Disclosures for Non-Financial Assets* – These amendments remove the unintended consequences of PFRS 13, *Fair Value Measurement*, on the disclosures required under PAS 36. In addition, these amendments require disclosure of the recoverable amounts for the assets or cash-generating units (CGUs) for which impairment loss has been recognized or reversed during the period. These amendments affect disclosures only and have no impact on the Company's financial position or performance.
- Amendments to PFRS 10, *Consolidated Financial Statements*, PFRS 12, *Disclosure of Interests in Other Entities* and PAS 27, *Separate Financial Statements: Investment Entities* - The amendments provide an exception from the requirements of consolidation for investment entities and instead require these entities to present their investments in subsidiaries as a net investment that is measured at fair value. Investment entity refers to an entity whose business purpose is to invest funds solely for returns from capital appreciation, investment income or both.

The adoption of the foregoing new and revised PFRS did not have any material effect on the consolidated financial statements. Additional disclosures have been included in the notes to consolidated financial statements, as applicable.

#### New and Revised PFRS Not Yet Adopted

Relevant new and revised PFRS which are not yet effective for the year ended December 31, 2014 and have not been applied in preparing the consolidated financial statements are summarized below:

Effective for annual periods beginning on or after July 1, 2014:

- Amendments to PAS 19, *Employee Benefits - Defined Benefit Plans: Employee Contributions* – The amendments apply to contributions from employees or third parties to defined benefit plans. Contributions that are set out in the formal terms of the plan shall be accounted for as reductions to current service costs if they are linked to service or as part of the remeasurements of the net defined benefit asset or liability if they are not linked to service. Contributions that are discretionary shall be accounted for as reductions of current service cost upon payment of these contributions to the plans.

- Amendments to PAS 24, *Related Party Disclosures - Key Management Personnel* – The amendments clarify that an entity is a related party of the reporting entity if the said entity, or any member of a group for which it is a part of, provides key management personnel services to the reporting entity or to the parent company of the reporting entity. These amendments also clarify that a reporting entity that obtains management personnel services from another entity (also referred to as management entity) is not required to disclose the compensation paid or payable by the management entity to its employees or directors. The reporting entity is required to disclose the amounts incurred for the key management personnel services provided by a separate management entity.
- Amendments to PFRS 13, *Fair Value Measurement - Short-term Receivables and Payables and Portfolio Exception* – The amendments clarify that short-term receivables and payables with no stated interest rates can be measured at invoice amounts when the effect of discounting is immaterial.

It also clarifies that the scope of the portfolio exception includes all contracts accounted for within the scope of PAS 39, *Financial Instruments: Recognition and Measurement* or PFRS 9, *Financial Instruments*, regardless of whether they meet the definition of financial assets or financial liabilities.

Effective for annual periods beginning on or after January 1, 2015:

- PFRS 9, *Financial Instruments: Classification and Measurement* - This standard is the first phase in replacing PAS 39, *Financial Instruments: Recognition and Measurement*, and applies to classification and measurement of financial assets as defined in PAS 39.

Effective for annual periods beginning on or after January 1, 2016:

- Amendments to PAS 16, *Property, Plant and Equipment* and PAS 38, *Intangible Assets: Clarification of Acceptable Methods of Depreciation and Amortization* - The Amendments clarify that the use of revenue-based methods to calculate depreciation and amortization of an asset is not appropriate because revenue generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic benefits embodied in an asset.

Effective for annual periods beginning on or after January 1, 2017:

- PFRS 15, *Revenue from Contracts with Customers* – This standard establishes the principles that an entity shall apply to report useful information to users of financial statements about the nature, timing, and uncertainty of revenue and cash flows arising from a contract with a customer.

Effective for annual periods beginning on or after January 1, 2018:

- PFRS 9, *Financial Instruments: Classification and Measurement* – This standard establishes principles for the financial reporting of financial assets and liabilities that will present relevant and useful information to users of financial statements for their assessment of the amount, timing and uncertainty of an entity's future cash flows.

Under prevailing circumstances, the adoption of the foregoing new and revised PFRS are not expected to have any material effect on the consolidated financial statements. Additional disclosures will be included in the notes to consolidated financial statements, as applicable.

---

#### 4. Summary of Significant Accounting Policies

The significant accounting policies that have been used in the preparation of the consolidated financial statements are summarized below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

##### Basis of Consolidation

**Subsidiary.** Subsidiary is an entity controlled by the Parent Company. The consolidated financial statements include the accounts of the Parent Company and its subsidiary, TMEC. The Parent Company has control when it is exposed, or has right, to variable returns from its involvement with the investee and it has the ability to affect those returns through its powers over the investee.

A subsidiary is consolidated from the date of acquisition or incorporation, being the date on which the Parent Company obtains control, and continue to be consolidated until the date such control ceases. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Parent Company gains control until the date the Parent Company ceases to control the subsidiary.

*Business Combinations* - Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the acquirer measures the non-controlling interest in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition costs incurred are recognized as expense.

Identifiable assets acquired and liabilities and contingent liabilities assumed in business combinations are measured initially at fair values at the date of acquisition.

As part of allocating the cost of the combination, the acquiree's identifiable assets, liabilities and contingent liabilities are measured by the acquirer at their fair values at the acquisition date. If the initial accounting for business combination can be determined only provisionally by the end of the period by which the combination is effected because either the fair values to be assigned to the acquiree's identifiable assets, liabilities or contingent liabilities or the cost of the combination can be determined only provisionally, the Group accounts the combination using provisional values. Adjustments to these provisional values as a result of completing the initial accounting shall be made within 12 months from the acquisition date. The carrying amount of an identifiable asset, liability or contingent liability that is recognized as a result of completing the initial accounting shall be calculated as if its fair value at the acquisition date had been recognized from that date and goodwill or any gain recognized shall be adjusted from the acquisition date by an amount equal to the adjustment to the fair value at the acquisition date of the identifiable asset, liability or contingent liability being recognized or adjusted. If the cost of acquisition is less than the fair value of the net assets of the acquiree, the difference is recognized directly in the consolidated statements of comprehensive income.

*Transactions Eliminated on Consolidation.* All intra-group balances, transactions, income and expenses and unrealized gains and losses are eliminated in full.

*Accounting Policies of Subsidiaries.* The financial statements of the subsidiary is prepared for the same reporting year using uniform accounting policies as that of the Parent Company.

## Financial Assets and Financial Liabilities

Financial assets and financial liabilities are accounted for as follows:

### a. Recognition

Financial instruments are recognized in the consolidated statements of financial position when the Group becomes a party to the contractual provision of the instruments. Financial instruments are initially recognized at fair value. Transaction costs directly attributable to its acquisition or issuance are included as part of its fair value except for those classified at fair value through profit or loss (FVPL). The Group uses trade date accounting to account for financial instruments.

*“Day 1” Difference.* The best evidence of fair value of a financial instrument at initial recognition is its transaction price, unless the fair value can be evidenced by comparison with other current market transactions in the same instrument or is based on a valuation technique whose variables include only data from observable markets. The Group recognizes the difference between the transaction price and the fair value (a “Day 1” difference) in profit or loss unless it qualifies for recognition as some other type of asset. In cases where the valuation uses unobservable data, the difference between the transaction price and the model value is only recognized in profit or loss when the inputs become observable, or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the “Day 1” difference.

### b. Classification

The Group classifies its financial assets as of initial recognition into the following categories: (a) financial assets at FVPL, (b) held-to-maturity (HTM) investments, (c) loans and receivables and (d) AFS financial assets. Financial liabilities, on the other hand, are classified as either financial liabilities at FVPL or other financial liabilities at amortized cost. The classification depends on the purpose for which the financial instruments were acquired or incurred and whether or not the instruments are quoted in an active market.

As at December 31, 2014 and 2013, the Group does not have financial assets and liabilities at FVPL, AFS financial assets and HTM investments.

*Loans and Receivables.* Loans and receivables are non-derivative financial assets with fixed or determinable payments and fixed maturities that are not quoted in an active market, other than those held for trading or classified as available for sale. After initial recognition, loans and receivables are subsequently measured at amortized cost using the effective interest method, less allowance for impairment, if any. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. The amortization is included in profit or loss.

Classified under loans and receivables are cash, receivables from employees (presented under “Prepayments and Other Current Assets”, funds held in escrow (excluding AFS financial assets) and advances to affiliates.

*AFS Financial Assets.* AFS financial assets are those nonderivative financial assets that are not designated as another category of financial assets. AFS financial assets are initially measured at fair value plus incremental direct transaction costs. After initial measurement, AFS financial assets are measured at fair value with unrealized gains or losses recognized as other comprehensive income (OCI). These changes in fair value are recognized as other comprehensive income until the investment is derecognized or until the investment is determined to be impaired at which time the cumulative gain or loss previously recognized in

OCI is reclassified to profit or loss. Unquoted equity securities whose fair value cannot be reliably measured are carried at cost.

The Group has classified its investments in government securities included in funds held in escrow account as AFS financial assets as at December 31, 2012. All AFS financial assets were sold in 2013.

*Other Financial Liabilities at Amortized Cost.* Financial liabilities which are not held for trading or are not designated at FVPL are classified as financial liabilities carried at amortized cost where the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder, or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of its own equity instruments.

Other financial liabilities are initially recognized at fair value less any directly attributable transaction costs. After initial recognition, other financial liabilities are measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any discount or premium on the issue and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the liabilities are derecognized or impaired, or through the amortization process.

The Group has classified its trade and other payables (excluding statutory payables) and advances from an affiliate under this category.

c. Reclassifications

A financial instrument cannot be reclassified into or out of the FVPL category after initial recognition.

For a financial asset reclassified out of the AFS category to loans and receivables or HTM investments, any gain or loss previously recognized in OCI, and any difference between the new amortized cost and maturity amount, are amortized to profit or loss over the remaining life of the investment using the effective interest method. If the financial asset is subsequently impaired, any gain or loss that has been recognized in OCI is reclassified from equity to profit or loss.

In the case of a financial asset that does not have a fixed maturity, the gain or loss shall be recognized in profit or loss when the financial asset is sold or otherwise disposed of.

#### d. Impairment of Financial Assets

The Group assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired.

A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is an objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset (a “loss event”) and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

*Financial Assets Carried at Amortized Cost.* For financial assets carried at amortized cost, such as loans and receivables, the Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for individually assessed financial assets, whether significant or not, it includes the financial assets in a portfolio with similar credit risk characteristics and collectively assesses them for impairment. Financial assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognized are not included in the collective assessment for impairment. For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of such credit risk characteristics as to type of borrower, collateral type, credit and payment status and term.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the excess of financial asset’s carrying amount over its net realizable value, normally based on the present value of the estimated future cash flows from the financial asset. The present value of the estimated future cash flows is discounted at the financial asset’s original effective interest rate. Time value is generally not considered when the effect of discounting is not material. If a financial asset has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate, adjusted for the original credit risk premium. The calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable. Any impairment loss determined is recognized in profit or loss.

The carrying amount of an impaired financial asset is reduced to its net realizable value through the use of an allowance account. For an impaired financial asset, interest income continues to be recognized using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

*AFS Financial Assets.* For equity investments classified as AFS financial assets, the Group assesses at each reporting date whether indications of impairment exists. An impairment indicator of equity investments classified as AFS financial assets is when there is a significant or prolonged decline in the fair value of the investments below its cost. Where there is evidence of impairment, the cumulative losses previously recognized as other comprehensive income is reclassified to profit or loss. Increase in fair value after impairment are recognized directly in equity as other comprehensive income.

e. Derecognition

A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized by the Group when:

- the right to the cash flows from the financial asset expired; or
- the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a “pass-through” arrangement; or
- the Group has transferred its right to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the assets, or (b) has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control over the asset.

Where the Group has transferred its right to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control over the asset, the asset is recognized to the extent of the Group’s continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset, if any, is measured at the lower of original carrying amount of the asset and the maximum amount of consideration that the Group could be required to pay.

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing financial liability are substantially modified, such an exchange or modification shall be accounted for as an extinguishment of the original financial liability and the recognition of the new financial liability, and the difference in the respective carrying amount is recognized in profit or loss.

f. Offsetting

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statements of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements such that the assets and liabilities are presented gross in the consolidated statements of financial position.

### Fair Value Measurement

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

### Funds Held in Escrow

The Group's funds held in escrow is composed of deposits with Bangko Sentral ng Pilipinas (BSP) and banks and investment in debt securities. The fund's investment in government securities are classified as AFS financial assets. Premiums or discounts are amortized over the life of the investments using the effective interest method. Unrealized gains and losses arising from the fair valuation of AFS financial assets are recognized in OCI until the financial assets are derecognized.

### Coal Inventory

Coal inventory is valued at the lower of cost and net realizable value (NRV). Cost is determined using the first-in, first-out method. The net realizable value of inventories is the estimated selling price in the ordinary course of business, less the estimated cost of marketing and distribution. In determining the net realizable value, the Group considers any adjustment necessary for obsolescence.

### Prepayments

Prepayments are expenses paid in advance and recorded as assets before these are utilized. Prepayments are apportioned over the period covered by the payment and charged to profit or loss when incurred. Prepayments that are expected to be realized for not more than 12 months after the financial reporting period are classified as other current assets. Otherwise these are classified as other noncurrent assets.

### Value-added Tax (VAT)

Revenue, expenses and assets are recognized net of the amount of VAT except:

- where VAT incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case VAT is recognized as part of the cost of acquisition of the asset or as part of the expense item, as applicable; or
- receivables and payables that are stated with the amount of VAT included.

The net amount of VAT recoverable to the taxation authority is classified as “Prepayments and other current assets” in the consolidated statements of financial position.

### Exploration and Evaluation Asset

Exploration and evaluation asset is carried at cost less accumulated impairment losses.

Exploration and evaluation activity involves the search for mineral resources, the determination of technical feasibility and the assessment of commercial viability of the coal resource.

Exploration and evaluation activity includes:

- Gathering exploration data through geological studies;
- Exploratory drilling and sampling; and
- Evaluating the technical feasibility and commercial viability of extracting the coal resource.

Exploration and evaluation asset is no longer classified as such when the technical feasibility and commercial viability of extracting the coal reserve are demonstrable. Exploration and evaluation asset is assessed for impairment, and any impairment loss recognized, before reclassification.

### Coal Reserves

Coal reserves are proven and probable coal reserves, which are defined as the estimated quantities of coal which geological data demonstrate with a specified degree of certainty to be recoverable in future years from known reservoirs and which are considered commercially producible.

Coal reserves are amortized from the commencement of production on a unit of production basis, which is the ratio of coal production in the period to the estimated quantities of commercial reserves at the end of the period plus the production in the period. Costs used in the unit of production calculation comprise the net book value of capitalized costs plus the estimated future development costs. Changes in the estimates of coal reserves or future development costs are accounted for prospectively.

### Property and Equipment

Property and equipment, except land, are carried at cost less accumulated depreciation and any impairment losses.

The initial cost of property and equipment consists of its purchase price, including import duties, and other costs directly attributable to bring the asset to its working condition and location for its intended use. Cost also includes the cost of replacing parts such as property and equipment when the asset recognition criteria are met and the present value of the estimated cost of dismantling and removing the asset and restoring the site where the asset is located.

expenditures incurred after the property and equipment have been put into operation, such as repairs, maintenance and overhaul costs, are normally charged to current operations. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the

future economic benefits expected to be obtained from the use of an item of property and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property and equipment. The cost of replacing a component of an item of property and equipment is recognized if it is probable that the future economic benefits embodied within the component will flow to the Group, and its cost can be measured reliably. The carrying amount of the replaced component is derecognized.

Depreciation is calculated on the straight-line basis over the estimated useful lives of the property and equipment as shown below:

|                                  | Number of Years |
|----------------------------------|-----------------|
| Drilling equipment               | 10              |
| Survey equipment and machineries | 3               |
| Laboratory and testing equipment | 5               |
| Transportation equipment         | 5               |
| Office furniture and equipment   | 3               |

The estimated useful lives and depreciation method are reviewed periodically to ensure that the periods and method of depreciation are consistent with the expected pattern of economic benefits from items of property and equipment.

When assets are retired or otherwise disposed of, the cost and the related accumulated depreciation and any impairment in value are removed from the accounts. Any resulting gain or loss is recognized to profit or loss.

Construction in progress represents properties under construction and is stated at cost, including cost of construction and other direct costs. Borrowing costs that are directly attributable to the construction of property and equipment are capitalized during the construction period. Construction in progress is not depreciated until such time that the relevant assets are completed and ready for operational use.

#### Intangibles

Intangible assets are stated at cost, which includes purchase price and other direct costs, less accumulated amortization and any impairment in value. Intangible assets with finite lives are amortized over their useful lives on a straight-line basis and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least annually. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the intangible assets with finite useful lives are recognized as part of current and future operations.

The useful life of an intangible asset arising from contractual or other legal rights should not exceed the period of those rights, but may be shorter depending on the period over which the intangible asset is expected to be used by the Group. The computer software is amortized on a straight-line basis over three years.

#### Impairment of Nonfinancial Assets

The carrying amounts of the Group's nonfinancial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated.

An impairment loss is recognized if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset group that

generates cash flows that are largely independent from other assets of the Group. Impairment losses are recognized in profit or loss in the period incurred.

The recoverable amount of a nonfinancial asset is the greater of its value in use or its fair value less costs to sell. Value in use is the present value of future cash flows expected to be derived from an asset while the fair value less cost to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable and willing parties less cost of disposal. In assessing value in use, the estimated future cash flows are discounted to their present values using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized.

#### Capital Stock

Capital stock is measured at par value for all shares issued.

#### Deficit

Deficit represents the cumulative balance of net loss.

#### Revenue Recognition

Revenue is recognized to the extent that the revenue can be reliably measure and it is probable that the economic benefits will flow to the Group. In addition, the following specific recognition criteria must also be met before revenue is recognized.

*Sale of Coal.* Revenue from coal sales is recognized when the goods are delivered, the title to the goods has passed to the buyer and the amount of revenue can be measured reliably.

*Interest Income.* Interest income is recognized as the interest accrues taking into account the effective yield on the asset.

#### Cost and Expense Recognition

Cost and expenses are recognized in profit or loss when a decrease in future economic benefit related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably.

*Cost of Sales.* Cost of sales are recognized as expenses when the related goods are sold and includes expenses directly related to sale of coal such as cost of fuel and lubricants, materials and supplies which are recognized as incurred.

*General and Administrative.* General and administrative expenses constitute cost of administering the business. These are expensed as incurred.

#### Employee Benefits

*Short-term Benefits.* The Group recognizes a liability net of amounts already paid and an expense for services rendered by employees during the accounting period. A liability is also recognized for the amount expected to be paid under short-term cash bonus or profit sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

Short-term employee benefit liabilities are measured on an undiscounted basis and are expensed as the related service is provided.

*Retirement Benefit Cost.* The retirement benefit cost is determined using the projected unit credit method which reflects services rendered by employees to the date of valuation and incorporates assumptions concerning employees' projected salaries.

The Group recognizes service costs, comprising of current service costs, past service costs, gains and losses on curtailments and non-routine settlements; and net interest expense or income in profit or loss. Net interest is calculated by applying the discount rate to the net retirement liability or asset. Past service costs are recognized in profit or loss on the earlier of the date of the plan amendment or curtailment; and the date that the Group recognizes restructuring-related costs.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on retirement liability or asset) are recognized immediately in OCI in the period in which they arise. Remeasurements are not reclassified to profit or loss in subsequent periods.

The retirement benefit liability is the present value of the retirement liability. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rate on government bonds that have terms to maturity approximating the terms of the related retirement benefit liability.

Actuarial valuations are made with sufficient regularity so that the amounts recognized in the consolidated financial statements do not differ materially from the amounts that would be determined at the reporting date.

#### Operating Leases

Leases, which do not transfer to the Group substantially all the risks and rewards of ownership of the asset are classified as operating leases. Operating lease payments are recognized in profit or loss on a straight-line basis over the lease term.

#### Income Taxes

*Current Tax.* Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rate and tax laws used to compute the amount are those that have been enacted or substantively enacted at the reporting date.

*Deferred Tax.* Deferred tax is provided on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits from the excess of minimum corporate income tax (MCIT) over the regular corporate income tax (RCIT) and unused net operating loss carryover (NOLCO), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and carryforward benefits of unused tax credits and unused tax losses can be utilized. Deferred tax, however, is not recognized when it arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each

reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rate that is expected to apply to the period when the asset is realized or the liability is settled, based on tax rate and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

#### Related Party Transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence. Transactions between related parties are accounted for at arm's-length prices or on terms similar to those offered to non-related parties in an economically comparable market.

#### Loss Per Share (LPS)

Basic LPS is computed by dividing losses applicable to common stock by the weighted average number of common shares outstanding after giving retroactive effect for any stock dividends, stock splits or reverse stock splits during the year.

#### Segment Reporting

Operating segments are components of the Group: (a) that engage in business activities from which they may earn revenue and incur expenses (including revenues and expenses relating to transactions with other components of the Group); (b) whose operating results are regularly reviewed by the Group's senior management, its chief operating decision maker, to make decisions about resources to be allocated to the segment and assess its performance; and (c) for which discrete financial information is available.

For purposes of management reporting, the Group's operating businesses are organized and managed separately based on the nature of the business segment, with each business representing a strategic business segment.

#### Provisions and Contingencies

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are discounted using a current pretax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but are disclosed in the notes to the consolidated financial statements when an inflow of economic benefits is probable.

## Events After the Reporting Date

Post year-end events that provide additional information about the Group's financial position at the end of reporting date (adjusting events) are reflected in the consolidated financial statements. Post year-end events that are not adjusting events are disclosed in the notes to the consolidated financial statements when material.

---

## 5. **Significant Accounting Judgments and Estimates**

The preparation of the Group's consolidated financial statements in compliance with PFRS requires management to make judgments and estimates that affect amounts reported in the consolidated financial statements and related notes. Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under circumstances. Actual results may ultimately differ from these estimates.

The following are the significant judgments and estimates made by the Group.

*Operating Lease Commitment - Group as a Lessee.* The Group has operating lease agreement for its office space. The Group has determined that the risk and rewards of ownership related to the leased property are retained by the lessor. Accordingly, the lease is accounted as operating lease.

Rent expense for period ended March 31, 2015 and for the period ended December 31, 2014 amounted to ₱1,015,322 and ₱4,061,287, respectively (see Note 14).

*Estimation of Mineral Resources.* The Group estimates its mineral resources based on information compiled by competent persons on geological and technical data on the size, depth, shape and grade of the mineral body and suitable production techniques and recovery rates. The analysis requires complex geological judgments to interpret the data. The estimation of recoverable reserves is based upon factors such as estimates of foreign exchange rates, commodity prices, future capital requirements, and production costs along with geological assumptions and judgments made in estimating the size and grade of the mineral body.

Management assumes conservative forecasted sales prices, based on current and long-term historical average price trends. Conservative forecasted sales price assumptions generally result in lower estimates of reserves.

As the economic assumptions used may change and as additional geological information is obtained during the exploration and evaluation of the mine properties, estimates of reserves may change. The changes may impact the Group's reported financial position and results which include:

- The carrying amount of exploration and evaluation asset and property and equipment may be affected due to changes in estimated future cash flows; and
- The recognition and carrying amount of deferred tax assets may change due to changes in the judgments regarding the existence of such assets and in estimates of the likely recovery of such assets.

The carrying amount of coal reserves amounted to ₱3,131,596,101 as at March 31, 2015 and December 31, 2014, respectively (see Note 10).

*Capitalization of Exploration and Evaluation Expenditure.* The capitalization of exploration and evaluation expenditure requires judgment in determining whether there are future economic benefits from future exploitation or sale of coal reserves. The capitalization requires management to make certain estimates and assumptions about future events or circumstances, in particular, whether an economically viable extraction operation can be established. Estimates and

assumptions made may change if new information becomes available. If, after expenditure is capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in profit or loss in the period when the new information becomes available.

As at March 31, 2015 and December 31, 2014, exploration and evaluation asset amounted to ₱341,583,966 and ₱324,862,804, respectively (see Note 10).

*Estimation of Useful Lives of Property and Equipment.* The Group estimates the useful lives of property and equipment based on the period over which the assets are expected to be available for use. The estimated useful lives of property and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, estimation of the useful life of property and equipment is based on collective assessment of industry practice, internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in factors mentioned above. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances.

Based on management's assessment as at December 31, 2013, there is no change in estimated useful lives of property and equipment during the period. Actual results, however, may vary due to changes in estimates brought about by changes in factors mentioned above.

As at March 31, 2015 and December 31, 2014, property and equipment, net of accumulated depreciation, amounted to ₱339,558,101 and ₱345,508,953, respectively (see Note 11).

*Impairment of Nonfinancial Assets.* The Group assesses impairment on nonfinancial assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized. Recoverable amounts are estimated for individual assets or, if it is not possible, for the cash-generating unit to which the asset belongs.

As at March 31, 2015 and December 31, 2014, nonfinancial assets which consist of exploration and evaluation asset, property and equipment, intangible assets and coal reserves amounted to ₱3,812,738,168 and ₱3,801,967,858, respectively (see Notes 5, 10, 11 and 12).

No impairment losses were recognized on nonfinancial assets in 2015 and 2014, respectively.

*Recognition of Deferred Tax Assets.* The Group reviews the carrying amounts of deferred tax assets at each reporting date and reduces deferred tax assets to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized.

As at March 31, 2015, the Group has deferred tax assets amounting to ₱ 5,284,424 (see Note 19).

*Retirement Benefit Costs.* The determination of the obligation and cost of retirement and other long-term employee benefits is dependent on the assumptions used by the actuary in calculating such amounts. These assumptions are described in Note 17 to the consolidated financial statements and include, among others, discount rates, expected rates of return on plan assets and salary increase rates. Actual results that differ from the Group's assumptions are accumulated and amortized over future periods and therefore, generally affect the recognized expense and recorded obligation in such future periods.

The retirement benefit liability as at March 31, 2015 amounted to ₱3,969,091 (see Note 16).

## 6. Business Combination

The stockholders of TMEC assigned in favor of the Parent Company the 100% ownership in TMEC on May 28, 2012 (see Note 1). The cost of the acquisition is composed of common shares of CAHI amounting to ₱ 3.2 billion and directly attributable costs amounting to ₱ 16.0 million (see Note 15).

The fair value of the identifiable assets and liabilities of TMEC at the date of acquisition and the corresponding carrying amounts immediately before the acquisition were:

|                                      | Fair Value<br>Recognized<br>on Acquisition | Carrying<br>Amount |
|--------------------------------------|--------------------------------------------|--------------------|
| Cash                                 | ₱2,927,400                                 | ₱2,927,400         |
| Trade and other receivables          | 315,020                                    | 315,020            |
| Coal inventory                       | 820,545                                    | 820,545            |
| Advances to affiliates               | 1,861,756                                  | 1,861,756          |
| Prepayments and other current assets | 545,041                                    | 545,041            |
| Exploration and evaluation asset     | 94,403,455                                 | 94,403,455         |
| Property and equipment               | 43,997,275                                 | 43,997,275         |
| Coal reserves                        | 3,131,596,101                              | —                  |
| Deferred tax assets                  | 1,583,103                                  | 1,583,103          |
| <b>Total Assets</b>                  | <b>3,278,049,696</b>                       | <b>146,453,595</b> |
| Trade and other payables             | 6,225,672                                  | 6,225,672          |
| Advances from affiliates             | 55,015,735                                 | 55,015,735         |
| Income tax payable                   | 133,500                                    | 133,500            |
| Retirement benefit liability         | 674,789                                    | 674,789            |
| <b>Total Liabilities</b>             | <b>62,049,696</b>                          | <b>62,049,696</b>  |
| <b>Net assets acquired</b>           | <b>₱3,216,000,000</b>                      | <b>₱84,403,899</b> |

The acquisition of the investment is considered as a noncash transaction in the consolidated statements of cash flows.

The Group obtained an independent valuation report using the discounted cash flow approach to estimate the value of the coal reserves. The expected net present value of the coal reserve is ₱12.5 billion, of which the Parent Company recognized only ₱3.1 billion representing the excess of the consideration over the net assets acquired.

---

## 7. Cash

This account consists of:

|                 | March 31, 2015     | 2014         |
|-----------------|--------------------|--------------|
| Cash in bank    | <b>₱ 2,079,938</b> | ₱ 4,577,366  |
| Cash on hand    | <b>630,407</b>     | 1,042,349    |
| Cash equivalent | <b>100,555,490</b> | 100,288,056  |
|                 | <b>₱5,741,174</b>  | ₱105,907,771 |

Cash in bank earns interest at the prevailing market interest rates. Cash equivalent refers to two-month time deposit in a local bank which earns interest at 2% annually.

Interest income consists of:

|                      | March 31, 2015  | 2014       |
|----------------------|-----------------|------------|
| Cash in bank         | <b>₱1,331</b>   | ₱204,876   |
| Funds held in escrow | <b>106,134</b>  | 1,001,487  |
| Cash equivalent      | <b>267,435</b>  | 288,056    |
|                      | <b>₱374,900</b> | ₱1,494,419 |

---

## 8. Funds Held in Escrow

The Group appointed Sterling Bank of Asia, Inc. as custodian bank (the Custodian Bank) to manage and administer the proceeds of the IPO.

The proceeds of the IPO are kept separate and distinct from all other funds in the custody of the Custodian Bank. The Custodian Bank maintains independent books of records for all transaction of the escrow account and shall release the proceeds to the Parent Company, subject to the issuance of a letter of instructions or a sworn statement of the Parent Company's Corporate Secretary in accordance with the work program approved by the SEC and PSE.

The funds held in escrow consist of the following:

|                              | March 31, 2015     | 2014        |
|------------------------------|--------------------|-------------|
| Assets:                      |                    |             |
| Time certificates of deposit | <b>₱20,979,855</b> | 32,397,744  |
| Other assets                 | <b>27,394</b>      | 3,371       |
|                              | <b>21,007,249</b>  | 32,401,115  |
| Equity:                      |                    |             |
| Principal                    | <b>9,705,930</b>   | 21,205,930  |
| Net accumulated income       | <b>11,301,319</b>  | 11,195,185  |
|                              | <b>21,007,249</b>  | 32,401,115  |
|                              | <b>₱21,007,249</b> | ₱32,401,115 |

The balance of the trust fund was certified by the Custodian Bank.

---

## 9. Prepayments and Other Current Assets

This account consists of:

|                                     | March 31, 2015     | 2014       |
|-------------------------------------|--------------------|------------|
| Input VAT                           | <b>₱ 1,445,661</b> | ₱1,360,674 |
| Advances to landowners              | <b>500,000</b>     | 500,000    |
| Receivables from employees/officers | <b>667,077</b>     | 255,748    |
| Restricted cash                     | <b>1,038,850</b>   | 1,038,850  |
| Prepayment for insurance            | <b>113,118</b>     | 125,614    |
| Others                              | —                  | —          |
|                                     | <b>₱3,764,706</b>  | ₱3,280,886 |

Advances to landowners are normally liquidated once the ownership of the land is transferred to the Group. Receivables from employees are normally settled within a year.

Restricted cash is a cash bond required by the National Commission on Indigenous Peoples (NCIP) upon the application of the Group's permit to proceed with its development phase for Coal Operating Contract (COC) No. 159.

---

## 10. Exploration and Evaluation Asset

Exploration and evaluation asset pertains to costs incurred for the exploration and evaluation of the mining properties situated in the province of Davao Oriental and Zamboanga Sibugay, Philippines.

COC Nos. 159, 166 and 167 provide a certain minimum work expenditure obligations covered by the work program of exploration phase (see Note 23).

The recovery of the exploration and evaluation asset is dependent upon the success of future exploration and evaluation activities and events.

Movements of this account are as follows:

|                                | Note | March 31, 2015      | 2014         |
|--------------------------------|------|---------------------|--------------|
| Balance at beginning of period |      | <b>₱324,862,804</b> | ₱266,549,664 |
| Additions for the period       |      | <b>16,721,162</b>   | 58,313,140   |
| Balance at end of period       |      | <b>₱341,583,966</b> | ₱324,862,804 |

The additions to the exploration and evaluation assets are as follows:

|                               | Note | March 31, 2015     | 2014        |
|-------------------------------|------|--------------------|-------------|
| Depreciation and amortization | 11   | <b>₱7,335,236</b>  | ₱22,869,885 |
| Personnel cost                | 16   | <b>4,315,552</b>   | 17,943,357  |
| Utilities                     |      | <b>68,226</b>      | 2,555,095   |
| Professional fees             |      | <b>60,000</b>      | 2,152,395   |
| Others                        |      | <b>4,942,148</b>   | 12,792,408  |
| Total                         |      | <b>₱16,721,162</b> | ₱58,313,140 |

Included as part of additions to the exploration and evaluation asset are non-cash items as follows:

|                               | Note | March 31, 2015    | 2014               |
|-------------------------------|------|-------------------|--------------------|
| Depreciation and amortization | 11   | <b>₱7,335,236</b> | ₱22,869,885        |
| Retirement benefit costs      | 16   | –                 | 1,233,228          |
| <b>Total</b>                  |      | <b>₱7,335,236</b> | <b>₱24,103,113</b> |

The Group disposed of incidental coal with a net proceeds of ₱69,376 in 2014.

The Group obtained an independent valuation report using the discounted cash flow approach to estimate the value of the coal reserves. The expected net present value of the coal reserve is estimated at ₱12.5 billion.

The Group obtained an enterprise valuation report dated March 15, 2013 to estimate the enterprise value of COC No. 159, Coal Blocks Nos. 217 (Macopa) and 136 (Bactinan). Discounted cash flow approach was used in the valuation of the coal reserve. The expected net present value of the coal reserve of COC No. 159, Coal Blocks Nos. 217 (Macopa) and 136 (Bactinan) is estimated at ₱4.1 billion. As at December 31, 2014, the fair value of the Company's coal reserve is classified in Level 1 of the fair value hierarchy.

In 2013, prior to the expiration of the COCs, the Group applied for a change in status of COC No. 159 from exploration and evaluation stage to development and production stage while COC No. 166 was renewed for further exploration and evaluation. In 2013, the Group applied for the renewal of COC No. 167 upon its expiration in 2013 with the DOE. The Group is waiting for the approval of DOE as of report date (see Note 23).

The assets, liabilities, income and expense and operating and investing cash flows as at and for the years ended December 31, 2014 and 2013 from the exploration for and evaluation of coal resources are as follows:

|                                           | March 31, 2015      | 2014         |
|-------------------------------------------|---------------------|--------------|
| Total assets                              | <b>₱691,311,212</b> | ₱683,123,195 |
| Total liabilities                         | <b>452,235,938</b>  | 441,845,244  |
| Expenses                                  | <b>2,208,202</b>    | 9,345,355    |
| Net cash used in by operating activities  | <b>2,083,891</b>    | 22,542,389   |
| Net cash used in investing activities     | <b>10,872,564</b>   | 106,498,072  |
| Net cash provided by financing activities | <b>10,055,910</b>   | 132,790,344  |

## 11. Property and Equipment

|                         |      | <b>₱773,162</b> | <b>₱2,573,599</b> |

#### 16. Retirement Benefit Liability

The Group has an unfunded defined benefit plan covering all of its regular employees. The benefits are based on years of service and compensation. The plan provides for lump-sum benefit payments upon retirement which shall not be less than the minimum mandated retirement benefit plan under Republic Act (RA) No. 7641 Retirement Pay Law. The latest actuarial valuation as at December 31, 2013 was prepared by an independent actuary using the projected unit credit method.

The following tables summarize the components of the retirement benefits cost recognized in consolidated statements of comprehensive income in 2015, 2014 and the liability amounts recognized in the consolidated statements of financial position.

The components of retirement benefit cost are as follows:

|                      | March 31, 2015 | 2014              |
|----------------------|----------------|-------------------|
| Current service cost | <b>₱—</b>      | ₱1,222,373        |
| Interest cost        | —              | 138,279           |
|                      | <b>₱—</b>      | <b>₱1,360,652</b> |

Retirement benefit costs are charged as follows:

|                                    | March 31, 2015 | 2014       |
|------------------------------------|----------------|------------|
| Exploration and evaluation asset   | P—             | P1,233,228 |
| General and administrative expense | —              | 127,424    |
|                                    | P—             | P1,360,652 |

The changes in the present value of the defined benefit obligation are as follows:

|                              | March 31, 2015 | 2014       |
|------------------------------|----------------|------------|
| Balance at beginning of year | P3,969,091     | P3,100,425 |
| Current service cost         | —              | 1,222,373  |
| Interest cost                | —              | 138,279    |
| Actuarial losses(gains):     |                |            |
| Experience adjustments       | —              | (238,817)  |
| Change in assumptions        | —              | (253,169)  |
| Balance at end of year       | P3,969,091     | P3,969,091 |

The remeasurement loss on retirement benefit liability recognized in other comprehensive income amounted to P198,084 as at March 31, 2015 and December 31, 2014.

## 17. Related Party Transactions

The significant transactions of the Group, in the normal course of business, with its related parties are described below

These are unsecured, noninterest-bearing and generally settled in cash and payable on demand.

The advances of the Parent Company to TMEC amounting to P437,959,757 were eliminated during consolidation.

Advances to Pacifico Sul Mineracao Corporation as at March 31, 2015 amounted to P55,923 for working capital requirements.

## 18. Financial Assets and Liabilities

The Group's financial instruments consist mainly of financial assets and financial liabilities directly related to operations, specifically cash, advances to affiliates, trade and other payables(excluding statutory payables) and advances from an affiliate.

The main risks arising from the Group's financial instruments are credit risk and liquidity risk. The BOD reviews and agrees on policies for managing each of these risks.

### Financial Risk Management Objectives and Policies

**Credit Risk.** The Group's exposure to credit risk arises from the failure on the part of its counterparty in fulfilling its financial commitments to the Group under the prevailing contractual terms. Financial instruments that potentially subject the Group to credit risk consist primarily of cash, funds held in escrow, receivables and advances to affiliates. The Group's maximum exposure is equal to the

carrying amount of these instruments. These present minimal credit risk based on management's assessment and are considered high grade accounts. High grade accounts consist of receivables from debtors with good financial condition and with relatively low defaults.

The following tables summarize the credit quality and per class aging analysis of the Group's financial assets as at March 31, 2015 and December 31, 2014:

|                        | March 2015                    |                |                              |              |
|------------------------|-------------------------------|----------------|------------------------------|--------------|
|                        | Neither Past Due nor Impaired |                | Past Due but<br>not Impaired | Total        |
|                        | High Grade                    | Standard Grade |                              |              |
| Loans and receivables: |                               |                |                              |              |
| Cash                   | ₱103,265,835                  | ₱—             | ₱—                           | ₱103,265,835 |

|                        | 2014                          |                |                              |              |
|------------------------|-------------------------------|----------------|------------------------------|--------------|
|                        | Neither Past Due nor Impaired |                | Past Due but<br>not Impaired | Total        |
|                        | High Grade                    | Standard Grade |                              |              |
| Loans and receivables: |                               |                |                              |              |
| Cash                   | ₱105,907,771                  | ₱—             | ₱—                           | ₱105,907,771 |

High grade accounts consist of financial assets from counterparties with good financial condition and with relatively low defaults. Financial assets having risks of default but are still collectible are considered standard grade accounts.

*Liquidity Risk.* Liquidity risk arises from the Group's inability to raise sufficient funds at the least possible cost to meet its financial commitments. The Group's objectives in liquidity management are: (a) to ensure that adequate funds are available to meet expiring obligations; (b) to meet the commitments as they arise without incurring unnecessary costs; and (c) to be able to access additional funding when needed at the least possible cost.

The financial liabilities of the Group based on remaining contractual obligations or on the estimated timing of net cash flows as at March 31, 2015 and December 31, 2014 amounting to ₱10,207,132 and ₱10,003,057, respectively(excluding statutory payable of ₱357,434 and ₱446,445 as at March 31, 2015 and December 31, 2014, respectively), are on demand.

#### Capital Management

The primary objective of the Group's capital management is to ensure that it maintains strong and healthy financial position to support its current business operations and drive its expansion and growth in the future. The Group manages the capital structure and makes adjustments to it in light of changes in economic conditions, its business activities, expansion programs and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Group may adjust its borrowings or raise capital.

In determining reasonable leverage, the Group evaluates its cost of capital and manages its level of debt to maintain an optional cost of capital based in current conditions. The Group considers its equity, excluding remeasurement loss on retirement benefit liability, as capital amounting to ₱3,932,365,246 and ₱3,935,40207 as at March 31, 2015 and December 31, 2014, respectively.

The Group is not subject to externally-imposed capital requirements.

---

## 19. Income Taxes

The Group is entitled to the following incentives under the COC:

- Exempt from all national taxes except for income tax; and
- Exempt from payment of tariff duties, compensating tax and value-added tax on importations of machinery and equipment, spare parts and materials required for the Coal Operation subject to terms and conditions in the COC.

No current income tax in 2015 due to the Group's loss position. The Group's income tax in 2014 amounting to ₱527 pertains to MCIT.

The Group's net deferred tax assets shown in the consolidated statements of financial position consist of:

|                                              | March 31, 2015 | 2014       |
|----------------------------------------------|----------------|------------|
| Deferred tax assets:                         |                |            |
| NOLCO                                        | ₱5,284,424     | ₱5,276,550 |
| Excess MCIT over RCIT                        | —              | 527        |

| exploration asset                            | —              | 1,183,380  |
|                                              | ₱5,284,424     | ₱5,284,424 |

Deferred tax assets on NOLCO amounting to ₱2,789,334 as at December 31, 2014 have not been recognized since the management believes that the Group may not be able to utilize these deductible temporary differences against future tax liabilities.

---

## 20. Basic Loss Per Share

The following table presents information necessary to calculate loss per share:

|                                              | March 31, 2015 | 2014          |
|----------------------------------------------|----------------|---------------|
| Net loss                                     | ₱3,036,826     | ₱9,362,484    |
| Divided by weighted average number of common |                |               |
| shares outstanding                           | 4,000,000,004  | 4,000,000,004 |
| Basic loss per share                         | ₱0.000         | ₱0.002        |

The Group has no dilutive potential common shares outstanding, therefore basic loss per share is the same as diluted loss per share.

---

## 21. Commitments

The Group has the following contractual commitments:

### Lease Agreement

The Group has a lease agreement with its affiliate, JTKC Equities, Inc., until July 31, 2015 renewable upon mutual consent of both parties. The lease agreement was renewed in 2014. Rental expense amounted to ₱1,015,322 in 2015 and ₱4,061,286 in 2014(see Note 15).

### Operating Contracts with DOE

The Government, through the Department of Energy (DOE), awarded COCs to the Group. The exploration phase under the COCs is for 2 years and can be extended for another 2 years upon the approval of the DOE. The development and production phase commences when DOE and the Group agrees on the existence of Coal Reserves in Commercial Quantity subject to the terms and conditions in the COC.

COC Nos. 159, 166 and 167 were extended for another 2 years in 2011 with the approval of DOE while COC Nos. 158 and 168 were given up by the Group due to non-prospectively of the areas for coal. In 2013 prior to the expiration of the COCs, the Group applied for a change in status of COC No. 159 from exploration and evaluation stage to development and production stage while COC No. 166 was renewed for further exploration and evaluation. The applications are pending approval by the DOE as of the report date. The DOE, however, terminated COC No. 167 because of the Group's purported nonfulfillment of its work obligations. The Group has filed for a motion for reconsideration and for the reinstatement of the said COC. The DOE has certified that the Group has filed an appeal citing additional work performed on the property and that 50% of the COC No. 167 is agricultural land, hence it is not available to any exploration activity. Moreover, the presence of armed conflict with the Abu Sayaff hampered the Group's movement in the area.

As a requirement of the application for conversion of COC No. 159 from exploration to development and production, the Group submitted to the DOE the 10-Year Work Program and Feasibility Study for COC No. 159 on October 20, 2014. Also, on May 16, 2014, the Department of Environment and Natural Resources (DENR) issued Environmental Compliance Certificate (ECC) for COC No. 159. As of report date, the Group is still working to secure the NCIP certificate of Non- Overlap, which is the final requirement for the conversion of COC No. 159.

As of report date, the documents submitted for the change in status of COC No. 166 are in the final stage of review by the DOE.

The Group believes that the termination of COC Nos. 158 and 168 will not result to an obligation that will materially affect its financial position and results of operations and that COC No. 167 will be reinstated.

COC No. 159 covers 7,000 hectares in Davao Oriental while COC Nos. 166 and 167 which are located Zamboanga Sibugay covers 4,000 hectares and 2,000 hectares, respectively. Activities done throughout the year includes surface geological investigation which involves surface field geologic mapping, geodetic surveying and trenching and subsurface geologic investigation though cored diamond drilling. As at March 31, 2015 and December 31, 2014, the Group has spent ₱478,794,075 for the direct implementation of the Work Program of the exploration phase of these COCs.

The DOE is paid, as share of the Government, the balance of the gross income after deducting all operating expenses and the Group's fee and special allowance. The operating expenses shall not exceed 90% of the gross income. Excess operating expenses can be recovered from the gross income in succeeding years. The Group is entitled to a fee and a special allowance, the net amount of which shall not exceed 40% and 30%, respectively, of the net operating income. The DOE's share under the COCs amounted to ₱51,492 in 2012.

---

## **22. Operating Segments**

For management reporting purposes, the Group is organized based on its activities and has one operating segment which is the coal mining segment. This segment undertakes the exploration and evaluation activities of the coal reserves of the Group and is concentrated to one location which is within the Philippines.

## MANAGEMENT'S DISCUSSION ON COAL'S FINANCIALS

### Summary of Financial Information

The following table represents the summary of financial information for COAL from January 1 to March 15, 2015.

|                                                       |                       |
|-------------------------------------------------------|-----------------------|
| <b>CONSOLIDATED STATEMENT OF COMPREHENSIVE INCOME</b> |                       |
| Sales                                                 | P–                    |
| Cost of sales                                         | –                     |
| Gross profit                                          | –                     |
| Operating expenses                                    | 3,411,726             |
| Other income (loss)                                   | 374,900               |

**UNAUDITED CONSOLIDATED STATEMENT OF COMPREHENSIVE INCOME FOR THE THREE-MONTH  
ENDED MARCH 31, 2015**

***Sales/Cost of Sales/Gross Profit***

TMEC is working on the conversion of COCs from exploration to development

***General and Administrative Expenses***

General and Administrative expenses amounted to ₱3.41 million for the three months ended March 31, 2015. These expenses were comprised primarily of office rental, consultancy fee, depreciation expense and salaries and wages.

***Operating Income and Operating Loss Margin***

The Company incurred an operating loss of ₱3.04 million.

***Interest Income***

Interest income amounted to ₱0.37 million, which came from interest earned from bank deposits, cash equivalents and funds held in escrow.

***Net Income and Net Income Margin***

The net loss of the Group for the period amounted to ₱3.04 million.

**UNAUDITED CONSOLIDATED STATEMENT OF FINANCIAL POSITION AS AT MARCH 31, 2015**

As at March 31, 2015, the total assets of the group amounted to ₱3,946.70 million as against ₱3,949.62 million as at December 31, 2014. Total current assets decreased to ₱128.09 million from ₱141.59 million, attributed mainly to the decrease in funds held in escrow used in the exploration activities of the Group. Noncurrent assets increased to ₱3,818.61 million from ₱3,808.03 million due to the increase in exploration and evaluation assets.

Current liabilities as at the end of the quarter decreased to ₱10.57 million from ₱10.45 million as at December 31, 2014 due to the decrease in accounts payable, accrued expenses and advances from related parties.

## Other Financial Information

As of and for period ended December 31, 2014:

- No material changes on COAL's financial position (changes of 5.00% or more) can be computed as the Company has only been incorporated on June 11, 2013.
- COAL is not aware of any known trends, or any known demands, commitments, events, or uncertainties that will result in or that are reasonably likely to result in COAL's liquidity increasing or decreasing in any material way.
- It is not aware of any event that would trigger direct or contingent financial obligation that is material to COAL, including any default or acceleration of an obligation.
- All material off-balance sheet transactions, arrangements, obligations and other relationships of COAL with unconsolidated entities or other persons created during the period were considered.
- There were no known trends, events, or uncertainties on net revenues or income from continuing operations.
- COAL is not aware of any significant elements of income and loss that did not arise from COAL's continuing operations.
- COAL is not aware of any seasonal aspects that had a material effect on the financial condition or results of operations.
- COAL is not aware of any seasonal aspects that had a material effect on the financial condition or results of operations.

## Key Performance Indicators

COAL uses the same measures that TMEC uses to assess following measures to assess its performance from period to period.

| Table 1: Key Performance Indicators of COAL |          |
|---------------------------------------------|----------|
| Gross Profit Margin (%)                     | —        |
| Net Income Margin (%)                       | (0.000%) |
| Return on Asset (%)                         | (0.000%) |
| Return on Equity (%)                        | (0.000%) |
| Current Ratio (x)                           | ₱12.12   |

## **Causes of major movements in financial statements**

### **Statement of Financial Position Items (March 31, 2015 vs. December 31, 2014)**

#### **Cash and cash equivalents**

Cash and cash equivalents decreased by ₱2.64 million or a 2% decrease from ₱105.91 million to ₱103.27 million for exploration and pre-development activities and operational activities of the Group.

#### **Funds held in escrow**

The decrease of funds held in escrow by ₱11.39 million or a 35% decrease from ₱32.40 million to ₱21.00 million because of exploration and development activities of the Group.

#### **Prepayments and other current assets**

The increase of ₱0.48 million or a 2% decrease from ₱3.28 million to ₱3.76 million was due to unliquidated advances of officers and employees.

#### **Exploration and evaluation assets**

The ₱16.72 million increase in exploration and evaluation assets or a 5% increase from ₱324.86 million to ₱341.58 million comprised of ₱7.34 million depreciation expenses and ₱9.39 million for cash-paid exploration and development of COC areas.

#### **Property and Equipment**

The net 2% decrease from ₱345.51 million to ₱339.56 million of property and equipment pertains to depreciation. Minimal purchase of equipment was made during the quarter.

#### **Equity**

Capital position went down by ₱3.04 million due to net loss for the period

### **Quarter ended March 2015 vs. Quarter ended March 2014**

#### **Revenue/Sales- Nil**

#### **Cost of sales- Nil**

#### **General and Admin expenses- 29% increased from ₱2.64 million to ₱3.40 million**

#### **Interest income - 33% decreased from ₱.55 million to ₱.37 million**

The decrease of ₱.18 million was due to decreasing balance of funds held in escrow.

#### **Net loss- 46% increased from ₱2.09 million to ₱3.04 million**

Net Loss of the Company for the quarter ended March 2015 was increased due to decrease in interest income and increase in general and administrative expenses.

In this interim period:

- i. There are no known trends, demands, commitments, events or uncertainties that will have material impact on the issuer's liquidity.
- ii. There are no events that will trigger direct or contingent financial obligation that is material to the company, including any default or acceleration of an obligation.
- iii. There are no off-balance sheet transactions, arrangements, obligations and other relationships of the company with unconsolidated or other persons created during the reporting period.
- iv. There are no known trends, events, or uncertainties that have had or that are reasonably expected to have materially favorable or unfavorable impact on net revenues or income from continuing operations.
- v. There are no significant elements of income and loss that did not arise from continuing operations.
